|--|-----------|
| <b>Announcements</b>   | <b>1</b>  |
| Call for Nominations . . . . .                                 | 1         |
| Changes in the ICA . . . . .                                   | 3         |
| <i>by Doug Stinson, President</i>                              |           |
| ICA Financial and Membership Report . . . . .                  | 4         |
| <i>by Spyros Magliveras, Registrar</i>                         |           |
| ICA Logos . . . . .  | 5         |
| 2016 Medal Winners and Presentation of the 2013 Euler Medal .  | 6         |
| Minutes of the March 8, 2017 Annual Meeting of the ICA . . . . | 8         |
| <i>by Sarah Holliday, Secretary</i>                            |           |
| <br>   |           |
| <b>Reports</b>   | <b>12</b> |
| Trends in Graph Theory and Combinatorics . . . . .             | 12        |
| <i>by Marco Buratti</i>  |           |
| Cheryl Praeger Retirement Mini-Symposium . . . . .             | 14        |
| <i>by Michael Giudici and John Bamberg</i>                     |           |
| <br>   |           |
| <b>Commentary</b>  | <b>15</b> |
| The Front Cover . . . . .                                      | 15        |
| <i>by David G. Glynn</i>                                       |           |
| <br>   |           |
| <b>Recreations</b>   | <b>18</b> |
| Palindromic Axioms for Groups . . . . .                        | 18        |
| <i>by R. Padmanabhan</i>                                       |           |

**Refereed contributions** **21**

**Articles**

- On Edge Extremal Properties of Hamilton Laceable Bigraphs . . . 21  
*by Gustavus J. Simmons*
- A New Method for Constructing Circuit Codes . . . . . 40  
*by Kevin Byrnes*
- An Intersection/Union Theorem For Several Families of Finite Sets 61  
*by A.J.W. Hilton*
- On a Decomposition of a Non-simple 5-design Into 3-designs . . . 71  
*by Iliya Bluskov and Alexander James*
- Some Nonexistence Results for Strong External Difference Families Using Character Theory . . . . . 79  
*by William J. Martin and Douglas R. Stinson*
- The Graphs that Dahlhaus Called “Good Generalized Strongly Chordal” . . . . . 93  
*by Terry A. McKee*

**Surveys**

- Horadam Sequences: A Survey Update and Extension . . . . . 99  
*by Peter J. Larcombe*

**Classroom notes**

- Contributions of Graphs to Staff Rostering . . . . . 119  
*by Joy Lind*
- Scheduling an Exciting Set of Rugby Matches . . . . . 128  
*by Joy Lind*
