Instructions to authors

Submission of a manuscript to the *Bulletin of the ICA* implies that the authors comply with the "Publication ethics and malpractice statement", see

http://bica.the-ica.org/policy/PEMS.pdf

Please submit your manuscript as a `.pdf` file via email to bica@the-ica.net and indicate which Bulletin policy category (News, Scholarly contributions, Peer-reviewed contributions) it belongs to.

Manuscripts should be prepared using LaTeX 2_ε with the bulletin class file `BICA.cls` that can be downloaded from

https://bica.the-ica.org/Files/ForAuthors.zip

Alternatively ensure the text width is 4.5 in., the text height is 7.125 in., and the text is in Computer Modern. (The default LaTeX font is Computer Modern.) Other useful files are available in the above `.zip` file, including a sample LaTeX file and a guide for typesetting references. We also recommend that authors review the bulletin policies found at

http://bica.the-ica.org/EdPolicy.php

Note that TeX and figure files are not required at submission stage, but will be required upon acceptance. We also request that accepted manuscripts adhere to the following.

- References are listed at the end of the manuscript in alphabetical order by first author's surname with numbered citations in the form [1], [2], etc.

- Standard journal name abbreviations are used. Common ones can be found by consulting `BICA_Reference_Guide.pdf` found in the above `.zip` file. A more complete list is maintained for the Mathematical Reviews

  https://mathscinet.ams.org/msnhtml/serials.pdf

- URLs are specified in their entirety. For example, the above URL was entered via

  ```
  \url{https://mathscinet.ams.org/msnhtml/serials.pdf}
  ```

- All text is in Computer Modern font. This includes text within tables, figures and included graphics.

- Theorems, lemmas, definitions, remarks, etc. are numbered collectively within sections, tables and figures are numbered independently within sections, for example:

  > Section 3, Definition 3.1, Lemma 3.2, Theorem 3.3, Table 3.1, Subsection 3.1, Lemma 3.4, Figure 3.1, Theorem 3.5, Table 3.2, Section 4, Lemma 4.1.

  This numbering scheme is applied automatically with the document class `BICA.cls`.
